Product Information

Model AC

Model AC factory set to automatically limit the flow rate to within 5% of the specified amount. The flow cartridge is removable from the valve body to provide access for flow rate changes, inspection, and cleaning without breaking the main piping. Pressure / Temperature ports are standard.

Model YC

Model YC is a combination ball valve, y-strainer and union with five (5) accessory port locations. 20 mesh stainless steel strainer is removable from the valve body for inspection and cleaning without breaking the main piping.

Hose

Hose assembly has a stainless steel outer braid over a inner tube and brass or steel fittings.
