

Staffed by Hydronic system experts

The IMI Flow Design Training Center is staffed by our team of hydronic system experts who bring in their real world experiences for a range of residential and commercial projects like hospitals, universities, hotels, stadiums, etc along with the knowledge and expertise that IMI Flow Design have had over years.

Customized Learning to Meet Your Needs

Are you experiencing any real world hydronic system needs? Bring to us your questions and concerns as well as the challenges you have been facing with an ongoing or upcoming design projects. With 5 customizable flow loops for hands on training and wide range of training program from basic hydronic to complex discussion around system, we will structure the training time with us to deliver specific knowledge or solution that best meets your need. All free of charge. We can handle upto 12 people, and no group is too small.
